Fun Productions, Inc. is the Team Building specialist in Colorado. We are proud to have won Colorado Meetings and Events Magazine's 2008 Best Teambuilding company of the year. We have created a wide variety of Team Building Programs. You can choose from our vast selection of tried and true concepts that will be tailored to your company and the goals you are trying to reach. We are also able to develop a program specifically for your theme and vision of the perfect experience. The challenges will be customized for your group's demographic profile or to reach certain goals

Team Building events serve multiple purposes. They can motivate, energize, create cohesive groups, improve communication skills, and increase product and training knowledge retention. These activities provide insight to the strengths of individuals. At the same time they teach participants that by working together, the team wins. The people that together create the backbone of your organization will take home an invaluable experience. Their experience will create lasting memories of the FUN they had. It is proven that Team Building activities increase productivity and employee retention. They also fill the workplace with an atmosphere of "this is a great team to be a part of."

All of our Team Building events will include the Challenges, facilitators, planning, scorekeeping systems, team identifiers, team captain agendas & maps with event instructions, some props & décor and the Emcee.

Team Building activities may be more productive with a debriefing session, we encourage including this activity in your Team Building events. A speaker from your organization, or a representative of Fun Productions, Inc. may facilitate this meeting and help the participants to understand the concept and the motive behind the exercise. This will allow maximum results from the experience.

Fun Productions, Inc. will work with you to arrange all of the logistics of the event such as venue selection, catering, entertainers, and speakers or we can help with references.
